

## 'Besel&Schwaeller Kapcsolóberendezések Kft. expands its production capacity.'

Pécs-based **Besel&Schwaeller Kapcsolóberendezések Kft.** has won **HUF 11,260,905** non-refundable EU aid in the 'Production capacity expansion of micro-, small- and middle-sized enterprises' tender under the Economy Development and Innovation Programme.

Tender identification number: **GINOP-1.2.1-14-2014-00931**

In the framework of the investment the plant of the company has been expanded with a cable processing automated machine of high capacity, and an industrial freight elevator has been installed in its recently delivered new production hall.

As a result of the investment the production capacity grows in the field of cable production, whereas the timeout of the production process decreases, which changes strengthen the competitiveness of the company in the international markets.

The sales of switch cabinets, cables, switchgears, and cable harnesses produced in Pécs almost exclusively take place within the Community.

Due to the intense flexibility of the company and the perfect quality of its products it has become a solid partner for numerous top companies in the global market in the field of metalworking, woodworking, pharmaceutical, and solar technology mechanical engineering, as well as of the car industry.
